

The DOODITIMES

NEWS FROM THE OUTER SECTORS

Refugee Doods have been pouring into the Axis Mundi from the Outer Sectors. The Times spoke to one: "We were just in the middle of our daily mooning ritual when it happened: Our Crescent God was attacked! A dark force surrounded him and began to tear him apart. He tried to use his signature pegs to hold himself together but it didn't work. Nothing could stop the Taint. And then the Doods around me...began to talk about vegetables and dieting...they had become corrupted Boods! Oh it was terrible!" He then fainted.

Do NOT Miss out on Nebula Expeditions!

Supernovas bursting in the night sky form incredible nebulas! Top Dood scientists have identified that these nebulas are in fact made out of sugar dust, and will lead to the creation of an intergalactic donut over time. Our lords and masters, the Godlings, have been inviting groups of lucky Doods on expeditions to these nebulas. Travel NOW for the ULTIMATE gourmet experience!

Massive Food Brawl Still Ongoing!

Food, glorious food! A late dinner party turned into a FOOD-TASTROPHE when the leader of the Pizza NewDoods, Cheeto Guava, spat on his doodburger and threw it to the floor right in front of the face of Doodburger TraditionaDood Lord Doodingham! An enormous food fight erupted; the month-long battle is still ongoing. Some Warrior and Guardian Apostles have recently joined the fray, but whether to fight or to eat, no dood can be sure.

Lorekeeper's Magnificent Journeys

Our Holy Overlord Lorekeeper, most majestic of Godlings, praised by his name, long may he reign, has continued his intergalactic tour of the godiverse and even beyond, into the reaches of the metaverse (so many verses), blazing a trail of destruction, food, and of course, loot (jesus that's a lot of loot). These are but a few of the stops along his magnificent journey.

Lorekeeper first came upon a Monstrous Godling, who invited our Overlord to look upon his unique collection of creatures, and indeed, Lorekeeper was impressed by this godling's Championing of breeding - he was even breeding planets! Have you ever seen planets have sex? Nature is incredible.

As he flew through a dusty nebula in the middle of deepspace, Lorekeeper discovered he was actually passing through a cloud of digits: numbers, so many numbers! Then, our mighty Lord met the Godling of Digits, who had made this nebula his home, and who kept treasures in boxes. What's in the box? WHAT'S IN THE BOX???

From his visit to the Digits Nebula, our noble Lorekeeper happened upon a troop of adventurous OG Godlings Hunting for rare Coins betwixt the gravitational pull of a binary star system. They were happy and surprised to hear Lorekeeper's mastery of the incredibly rare and mysterious language of Doodinese. Do you know what $\langle \diamond \rangle \square \wedge \rangle$ means?

Lorekeeper was famished from his adventures, and so went to visit his good friend, the Avocadian Overlord. "I gotta bring some of these back for my Doods," thought Lorekeeper as he munched on an avocado mixed with crab and truffle. He returned at last to the godiverse and showered the land in avocados, from which must toast and guac was made. Amen.

V.I. Dood

Gordon Ramsdood, the world's most famous chef, has just arrived in town to open his new restaurant, but things did not go as planned when all of the DoodStaff and DoodCooks were fired on the first day. RamsDood was irritated when his doodsouschef overcooked the sandwich, but things got heated when Ramsdood humiliated her in front of the customers. Ramsdood smacked two slices of bread in front of her face, transforming her face into a sandwich and asking, "What are you?" She replied, "I'm an Idiot Sandwich," in tears and embarrassment, and he fired every other dood. His staff's incompetence irritated him. The following day, he transformed his restaurant into a new cooking show called MasterCheffyDood.
